

EUREKAHEDGE DATA NOW AVAILABLE IN PERTRAC FORMAT

Memphis, TENNESSEE, March 10, 2003 – Strategic Financial Solutions, LLC, (SFS) creator of the world's leading asset allocation and investment analysis software PerTrac 2000 SE, announced today that, effective immediately, the Eureka hedge Asian Hedge Fund Directory will be available for use with PerTrac 2000 software.

Investment data is currently available to PerTrac 2000 users through relationships with ten of the leading alternative investment data providers, as well as four commodity trading advisor (CTA) data services and five traditional databases. This enables PerTrac customers to obtain unprecedented access to a wealth of investment data, all within the industry standard's software for analysis, asset allocation and reporting.

Established in 2001 by Richard Armstrong and Niall Shiner, long-term veterans of the Asian stock broking industry, Eureka hedge has continued to expand, and now includes approximately 20 professionals in their Singapore and Hong Kong offices. They provide comprehensive services to the Asia Pacific hedge fund industry, ranging from informational-type product offerings like directories and databases, to advisory and marketing assistance to existing hedge funds, and supporting prospective managers in establishing their own funds.

"Eureka hedge is proud and happy to be bringing their products to a wider audience via PerTrac," said Kate Colchester, an executive with Eureka hedge. "We see this alliance as giving added functionality to both companies' systems and making them even more valuable tools."

"We are committed to developing the best investment analysis platform for our customers and allowing them to populate it with high quality investment information," said Frank Smith, co-founder and principal of Strategic Financial Solutions, LLC. "With the addition of Eureka hedge data, we are giving clients yet another way to improve their data screening and analysis."

Introduced in 1996, **PerTrac 2000 SE** is now used by over 900 clients in 36 countries, including banks, brokerage firms, consultants, plan sponsors, family offices, investment managers and funds of funds. PerTrac's full suite of services allows staffs to operate at maximum capacity while simultaneously reducing the overlapping costs of multiple software programs. Data is readily available from a wide variety of outside sources on a wealth of investment vehicles, including hedge funds, CTAs, mutual funds and separately managed accounts. PerTrac offers comprehensive information management capabilities that can be customized and searched based on almost unlimited criteria. The software also rapidly calculates over 900 investment statistics and provides manager searches, portfolio construction, optimization, style, peer group and statistical analysis, and Monte Carlo simulation. Once statistics are compiled, **PerTrac Publisher** can swiftly produce a wide range of fully customizable presentation materials, including charts and graphs. PerTrac also easily interfaces with an array of Microsoft programs, including Word, Excel and PowerPoint. In addition, SFS now offers **PerTracNet**, a comprehensive web-based tool that combines PerTrac's proven analytic capabilities with turnkey website development and hosting services. Favored by investment managers, PerTracNet eliminates the need for expensive design and hosting services and quickly establishes a presence on the Internet. PerTrac has also introduced **PerTrac Publishing and Design**, a one-stop analysis and design center for marketing documents and client reports. For traditional investment analysis, SFS has launched **StyleTrac.com** with partner Nelson Information, a division of Thomson Financial Group. This website offers free web-based style analysis of more than 8,700 mutual funds and 3,600 separately managed accounts.
